

“CAS leading post-pandemic AI”

AICAS 2022

IEEE International Conference on Artificial Intelligence Circuits and Systems

June 13-15, 2022 Songdo Convensia, Incheon, Korea

www.aicas2022.org

AICAS 2022 Exhibition Introduction

Please send the company introduction or description of exhibition to AICAS 2022 secretariat. If you don't have any materials, please fill out this 'Exhibition Introduction'. The company introduction and exhibition introduction will be uploaded with company CI on the online exhibition page on the website. We recommend a **pdf file format** for materials. Thank you for cooperation.

Company Name	Libertron Co., Ltd.
Website	https://libertron.com/
Contact number	+82-2-3486-5278
E-mail	sales@libertron.com
Exhibit item	FPGA AI Solution & Development Kit

Introduction

Libertron was founded in 1998 and has accumulated numerous development experiences and trust in related industries in various fields such as embedded machine vision, high-speed interface and networking, testing and measurement, and FPGA-based deep learning over the past 20 years.

As Xilinx's certified Design Service Alliance, Authorized Training Providers (ATP) and Xilinx University Partner (XUP), and official Xilinx Value Added Reseller (VAR), It continues to provide companies, universities, and research institutes with a variety of the latest FPGA AI solutions and products.

Libertron is developing and supplying an all-in-one type HPC server solution optimized for AI environments, the Presto-AI server solution. This is equipped with CPU, FPGA, and GPU in one server, implementing an optimal AI solution and execution environment with heterogeneous accelerated servers that maximize the advantages of FPGA and GPU.

The AI/ML solutions from Libertron and partners can support the easy deployment with reasonable performance on Xilinx Alveo platform. Customer can easily select their neural network model for their applications and deploy on the target Alveo cards with provided Deep-learning Processing Unit (DPU) . Moreover, customer can directly change their GPU base running source code to FPGA execution with zero effort.
